PROJECTS WORKED ON

Project-1

Project Name : Secure Zone (Risk Intelligence)

Role : Front-end Developer

Technology : HTML5, CSS3, BOOTSTRAP, JAVASCRIPT, TYPESCRIPT, ANGULAR.

Description :

Secure Zone has brought together a talented team of professionals with decades of experience in their respective fields. Our management team has a proven track record of creating, building, and growing businesses to serve clients (and the market) with innovative enterprise solutions. With a team of dedicated developers, intel analysts, sales and support, Secure Zone is already offering clients across the world unmatched EsRM service.

Responsibilities :

- Implementing data binding between the server and the Angular UI to ensure dynamic content updates and synchronization.
- Utilizing Angular services to manage data flow and communication between components and backend.
- Ensuring components are responsive and compatible across different devices using technologies like CSS3 and Bootstrap.
- Developing complex forms using Angular's FormGroup and FormControl to manage form state and data.
- Implementing client-side form validation to enhance user input accuracy and improve the user experience.

- Writing Angular services to call backend APIs and handle HTTP request and responses. And also ensuring secure and efficient data retrieval and submission through API endpoints.

Project-2

Project Name : youVA.com

Role : Angular Developer

Technology : HTML5, CSS3, BOOTSTRAP, TYPESCRIPT, ANGULAR 15, JSON

Description :

This is an e-commerce website designed to provide a seamless online shopping experience. The project showcases the functionality of adding items to a shopping cart, dynamically updating item prices, and calculating the grand total. Key features include user authentication, product management, and CRUD operations for both users and administrators. The project emphasizes a responsive design, ensuring compatibility across various devices.

Responsibilities :

- Implemented data binding between the JSON API and the Angular UI.
- Managed communication between components and the backend using Angular services.
- Ensured the application was responsive and visually appealing using CSS3 and Bootstrap.
- Created and managed complex forms using FormGroup and FormControl.
- Implemented client-side form validation to ensure accurate user inputs.
- Developed Angular services to handle HTTP requests and integrate with the backend JSON API. And also fetched and displayed product details, including images, from the JSON API.
- Developed CRUD functionalities for product management accessible to both roles as per their permissions.
- Managed project tasks and resolved issues efficiently.
